

Dear Teachers,

My Basic Skills students enjoy playing math games and using math centers. They also enjoy doing word sorts. That is why I decided to combine sorting with practicing addition facts.

My **Addition Bee Math Sort: Within 10, Within 20, and Beyond** includes 53 pages. *Addition Bee #1* (Within 10) includes 90 number sentence cards, 3 category cards, and a cover and direction card. *Addition Bee #2* (Within 20) includes 198 cards, 3 category cards, a cover and direction card. Both sorts include a sheet, so students can write their number sentences and answers in the correct categories. This math center is easy to set up: print in color on paper or card stock, laminate, and cut. The cards will fit neatly into a small Ziploc bag. A great way to help your students become more fluent with their math facts.
